

## CONTENTS

<b>W. F. Bauer:</b> Modified Sturm-Liouville systems . . . . .	273
<b>Garrett Birkhoff:</b> Induced mass with variable density . . . . .	109
<b>J. E. Brock:</b> Variation of coefficients of simultaneous linear equations. . . . .	234
<b>H. D. Brunk:</b> Approximate solution of an initial value problem by generalized cardinal series . . . . .	285
<b>Han Chang and V. C. Rideout:</b> A generalization of modulation spectra . . . . .	87
<b>Sin-I Cheng:</b> On the stability of laminar boundary layer flow . . . . .	346
<b>P. R. Clement:</b> The Chebyshev approximation method . . . . .	167
<b>H. Cohn</b> ( <i>see J. H. Giese</i> )	
<b>Sisir Chandra Das:</b> Note on the elastic distortion of a cylindrical hole by tangential tractions on the inner boundary. . . . .	124
<b>F. DiMaggio</b> ( <i>see M. G. Salvadori</i> )	
<b>J. L. Fox and G. W. Morgan:</b> On the stability of some flows of an ideal fluid with free surfaces . . . . .	439
<b>J. H. Giese and H. Cohn:</b> Two new non-linearized conical flows . . . . .	101
<b>J. J. Gilvarry:</b> Linear approximations in a class of non-linear . . . . .	145
<b>S. Gorn:</b> Series expansions of rays in isotropic, non-homogeneous media. . . . .	355
<b>C. A. M. Gray:</b> An iterative solution to the effects of concentrated loads applied to long rectangular beams . . . . .	263
<b>M. C. Gray:</b> Legendre functions of fractional order . . . . .	311
<b>H. S. Green and H. Messel:</b> On the expansion of functions in terms of their moments. . . . .	403
<b>T. R. Greene and A. E. Heins:</b> Water waves over a channel of infinite depth . . . . .	201
<b>A. E. Heins</b> ( <i>see T. R. Greene</i> )	
<b>I. N. Herstein:</b> Some mathematical methods and techniques in economics . . . . .	249
<b>C. O. Hines:</b> Reflection of waves from varying media. . . . .	9
<b>N. J. Hoff, Joseph Kempner, and Frederick V. Pohle:</b> Line load applied along generators of thin-walled circular cylindrical shells of finite length . . . . .	411
<b>H. G. Hopkins:</b> The plastic instability of plates . . . . .	185
<b>J. C. Jaeger:</b> Pulsed surface heating of a semi-infinite solid . . . . .	132
<b>J. B. Keller:</b> Parallel reflection of light by plane mirrors . . . . .	216
<b>Joseph Kempner</b> ( <i>see N. J. Hoff</i> )	

<b>W. T. Koiter:</b> Stress-strain relations, uniqueness and variational theorems for elastic-plastic materials with a singular yield surface . . . . .	350
<b>C. C. Lin:</b> Note on the mean square value of integrals in the statistical theory of turbulence . . . . .	367
<b>G. C. McVittie:</b> A method of solution of the equations of classical gas-dynamics using Einstein's equations . . . . .	327
<b>R. H. MacNeal:</b> An asymmetrical finite difference network . . . . .	295
<b>Wilhelm Magnus:</b> Infinite matrices associated with diffraction by an aperture . .	77
<b>E. F. Masur:</b> Lower and upper bounds to the ultimate loads of buckled redundant trusses . . . . .	385
<b>Z. A. Melzak:</b> The effect of coalescence in certain collision processes . . . . .	231
<b>H. Messel</b> ( <i>see H. S. Green</i> )	
<b>John W. Miles:</b> A general solution for the rectangular airfoil in supersonic flow. .	1
<b>J. W. Miles:</b> A note on my paper "A general solution for the rectangular airfoil in supersonic flow" . . . . .	246
<b>J. W. Miles:</b> A note on subsonic edges in unsteady supersonic flow . . . . .	363
<b>G. W. Morgan:</b> Some remarks on a class of eigenvalue problems with special boundary conditions . . . . .	157
<b>G. W. Morgan</b> ( <i>see J. L. Fox</i> )	
<b>J. A. Morrison:</b> Closure waves in helical compression springs with inelastic coil impact. . . . .	457
<b>H. E. Moses:</b> A note on the application of Schwinger's variational principle to Dirac's equation of the electron . . . . .	111
<b>H. Ōkubo:</b> The torsion and stretching of spiral rods (II) . . . . .	488
<b>W. Ornstein:</b> Note on rectangular plates: deflection under pyramidal load. . . .	339
<b>D. C. Pack and S. I. Pai:</b> Similarity laws for supersonic flows . . . . .	377
<b>S. I. Pai</b> ( <i>see D. C. Pack</i> )	
<b>C. E. Pearson:</b> Note on self-propagation of turbulent spots . . . . .	219
<b>Frederick V. Pohle</b> ( <i>see N. J. Hoff</i> )	
<b>R. F. Probstein:</b> On a solution of the energy equation for a rotating plate started impulsively from rest . . . . .	240
<b>C. R. Putnam:</b> A sufficient condition for an infinite discrete spectrum. . . . .	484
<b>C. R. Putnam:</b> On the gaps in the spectrum of the Hill equation . . . . .	496
<b>E. Reich:</b> A random walk related to the capacitance of the circular plate condenser .	341
<b>Eric Reissner:</b> On finite twisting and bending of circular ring sector plates and shallow helicoidal shells . . . . .	473

<b>V. C. Rideout</b> ( <i>see Han Chang</i> )	
<b>F. Virginia Rohde:</b> Large deflections of a cantilever beam with uniformly distributed load . . . . .	337
<b>Charles Saltzer:</b> The second fundamental theorem of electrical networks . . . .	119
<b>M. G. Salvadori and F. DiMaggio:</b> On the development of plastic hinges in rigid-plastic beams . . . . .	223
<b>George Seifert:</b> On certain solutions of a pendulum-type equation . . . . .	127
<b>R. T. Shield:</b> Mixed boundary value problems in soil mechanics . . . . .	61
<b>E. Sternberg:</b> On Saint-Venant's principle. . . . .	393
<b>W. M. Stone:</b> A form of Newton's method with cubic convergence . . . . .	118
<b>J. L. Synge:</b> The fundamental theorem of electrical networks . . . . .	215
<b>I. Tasny-Tschiassny:</b> The location of the roots of polynomial equations by the repeated evaluation of linear forms . . . . .	319
<b>M. D. Van Dyke:</b> On supersonic flow past an oscillating wedge . . . . .	360
<b>A. Van Wijngaarden:</b> On a certain asymptotic expansion . . . . .	244
<b>Alexander J. Wang:</b> Plastic flow in a deeply notched bar with semi-circular root .	427
<b>Gregory H. Wannier:</b> Connection formulas between the solutions of Mathieu's equation . . . . .	33
<b>J. C. Wilhoit, Jr.:</b> An addition to Poritsky's solutions of a differential equation of torsion . . . . .	499
<b>Book Reviews</b> . . . . .	137, 246, 370, 501
